# Kyung Hee University Healthcare System – An Important Legacy and a Bright Future for Healthcare Services in Korea

Kyung Hee University, a bastion of academic excellence and peace, launched Kyung Hee Medical School in 1965 with the aim of achieving the university's founding philosophy of "creating a world of cultural sophistication". The school covered medicine, dentistry, oriental medicine, pharmacy, and nursing science. Kyung Hee Medical School has since evolved into the Kyung Hee University Medical Division. It now consists of the College of Medicine and Professional Graduate School of Medicine, College of Dentistry and Professional Graduate School of Dentistry, College of Oriental Medicine, College of Pharmacy, College of Nursing Science, and the Graduate School of East-West Medical Science, in addition to the Kyung Hee University Healthcare System, a healthcare institution which is comprised of Kyung Hee University Medical Center (with four affiliated hospitals) and Kyung Hee University Hospital at Gangdong (with three affiliated hospitals). Kyung Hee Medical School has remained dedicated to achieving "a world without disease" by creatively expanding the parameters of medicine over the past five decades.

# Focused on beating cancer A top-tier hospital acclaimed for cancer treatment

Kyung Hee University Hospital at Gangdong provides exceptional cancer treatment based on a unique multidisciplinary team care approach, a patient care system that places the highest priority on cancer patients, and cutting-edge equipment. Healthcare professionals from different disciplines are brought together to deliver better outcomes for patients through advanced treatment options such as minimally invasive surgery, targeted therapy, and immunotherapy, while the hospital's patient care system places the highest priority on cancer patients to ensure quick diagnosis and treatment. Kyung Hee University Hospital at Gangdong was rated first in Health Insurance Review & Assessment Service's feasibility assessments on the treatment of gastric cancer, colorectal cancer, lung cancer, and breast cancer, testifying to the hospital's unrivalled expertise in cancer treatment.

Rated first in Health Insurance Review & Assessment Service's feasibility assessments on the treatment of the four major cancers (gastric cancer, colorectal cancer, lung cancer, and breast cancer)

## Ranked first in the general hospital sector in the national patient experience assessment by the Ministry of Health and Welfare

### Rated as the Best by Patients

Kyung Hee University Hospital at Gangdong is focused on the wellbeing of patients. The hospital provides first-rate healthcare services based on accurate diagnoses and treatment options tailored to address the individual needs of patients. Kyung Hee University Hospital at Gangdong's foothold as a patient-centered hospital was further reinforced by ranking first in the general hospital sector in the patient experience assessment conducted on inpatients across the nation. The hospital scored the highest across all assessment criteria including patient care by physicians, the administering of medication and treatment procedures, and protection of patient rights, proving its status as one of Korea's best healthcare providers.

### A Smart Hospital That Maximizes Patient Convenience through Innovative Infrastructure

Kyung Hee University Hospital at Gangdong has adopted the mobile medical application "Smart Guide" to provide more convenient access to information required by individual patients, from outpatient care to hospitalization and surgery. The hospital also ensured maximum convenience throughout all patient procedures and the visitor experience by adopting an automated self-registration system and EMR mobile system.

# A front runner in the surgical treatment of the most challenging serious diseases such as cancer, cranial nerve disorders, and cardiac disorders

Kyung Hee University Hospital at Gangdong specializes in surgical treatment, with over 1,000 operations performed on a monthly basis. The hospital continues to set high standards by performing some of the most challenging operations from cancer surgery to organ transplants, spine and joint surgery, and brain surgery.

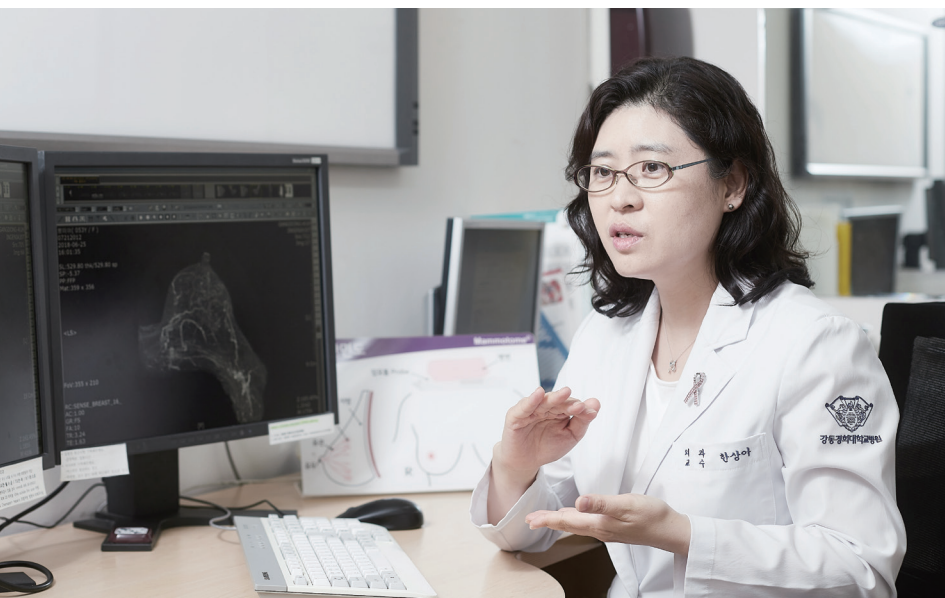

# A State-of-the-Art Robotic Surgery Center

Kyung Hee University Hospital at Gangdong performs ultra-precision surgical operations using Da Vinci XI, the most innovative robotic surgery system. Da Vinci XI is applied to numerous disciplines including obstetrics and gynecology, general surgery, urology, and otolaryngology to deal with conditions ranging from benign diseases to the most challenging cancers. Through this, Kyung Hee University Hospital at Gangdong has emerged as the front runner in single-incision robotic surgery.

# Pioneering Many Firsts through the Organ Transplant Center

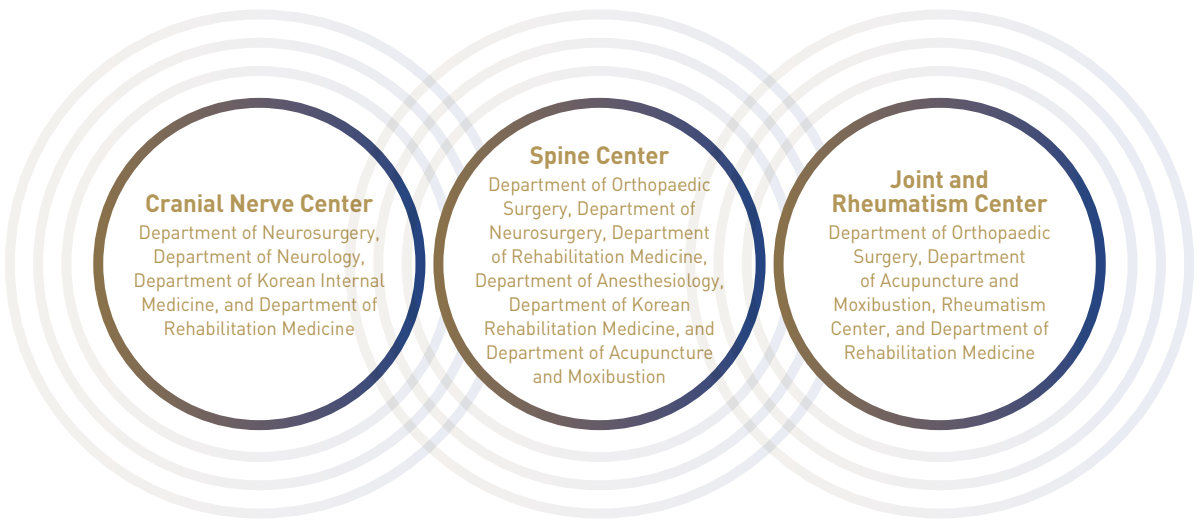

Kyung Hee University Hospital at Gangdong's Organ Transplant Center is equipped with state-of-the-art patient care systems and high-caliber healthcare professionals. The center came to prominence in 2008 by successfully performing a living-donor partial liver transplant for a urinary tract dysbolism patient for the first time in Korea. The center has continued to strengthen its status as a transplant specialist by succeeding in some of the most challenging transplants including living-donor liver transplants and cornea transplants.

# Multidisciplinary Care Center – Optimized Patient Care Based on Teamwork between Experts in Western and Oriental Medicine

Kyung Hee University Hospital at Gangdong is known for launching Korea’s first system of multidisciplinary care that involves western and oriental medicine through the Multidisciplinary Care Center. The center provides comprehensive patient care and specializes in cranial nerve disorders, joint disorders, and spine disorders. Cooperation of health professionals in both western and oriental medicine enables pinpointed and efficient patient care. The center has been highly rated by patients from Korea and beyond for delivering better outcomes and greater convenience.

29 Departments

Cardiology, Pulmonology, Gastroenterology, Endocrinology, Nephrology, Infectious Diseases, Rheumatology, Oncology, Neurology, Psychiatry, General Surgery (Digestive Surgery, Breast and Thyroid Gland Surgery, and Vascular Surgery), Orthopaedic Surgery, Neurosurgery, Thoracic Surgery, Plastic Surgery, Anesthesiology, Obstetrics and Gynecology, Pediatrics, Ophthalmology, Otorhinolaryngology, Dermatology, Urology, Radiology, Radiation Oncology, Pathology, Laboratory Medicine, Rehabilitation Medicine, Nuclear Medicine, and Emergency Medicine

Medical Hospital  
A World-Class Patient Care System

Medical Hospital is acclaimed for its services focused on the wellbeing of patients. The hospital boasts an innovative treatment system represented by specialized treatment centers such as the Cardiovascular Center and Respiratory Disease Center, which operate based on teamwork between multidisciplinary healthcare professionals. Medical Hospital was rated first in all feasibility assessments conducted by Health Insurance Review & Assessment Service for the treatment of acute cerebral infarction, acute myocardial infarction, coronary artery bypass graft, chronic obstructive pulmonary disease, pneumonia, and hip replacement surgery as well as the four major cancers (gastric cancer, colorectal cancer, breast cancer, and lung cancer), testifying to its position as one of the nation's top-tier hospitals.
